About Me

Dedicated Frontend Developer with internship experience at ZapOne Solutions Pvt Ltd. Proficient in HTML, CSS, Tailwind CSS, and JavaScript, including ReactJS library. Specializing in crafting user-friendly and visually engaging interfaces, I am eager to transition into a full-time role, bringing hands-on expertise and a passion for creating seamless web experiences to a dynamic and collaborative team.

Projects

● [PortFolio](#)

"My Portfolio" ensuring a responsive design for optimal user experience across Devices. Implemented dynamic visual effects using Tailwind CSS and JavaScript including ReactJs Library to enhance the overall aesthetic appeal of the website.

● [Expense-Tracker-Web App](#)

Created a robust expense tracker web app with ReactJS and Firebase, enabling real-time tracking of income and expenses. The application ensures secure user login via email ID and provides dynamic data visualization. Designed for seamless personal finance management, it offers an intuitive interface and updates the available balance instantly after income or expense transactions.

● [University Website Clone](#)

Developed a responsive frontend Responsive website clone of a university using HTML, CSS, and JavaScript. The project showcases a compelling user interface, emphasizing my skills in creating engaging web experiences.

Experience (Internship)

Currently working as a Frontend Developer Intern at ZapOne Solutions Pvt Ltd since May 2023, actively contributing to the development and enhancement of user interfaces. Spearheading projects to ensure seamless navigation and optimal user experiences. Engaging in collaborative efforts with cross-functional teams and demonstrating Proficient in HTML, CSS, Tailwind CSS, and JavaScript, including ReactJS library .Successfully implementing responsive design principles and dynamic visual elements. Continuously learning and adapting to emerging frontend technologies.
